

## Where We Serve

## Focus Area

USAID AMPATH Uzima care and treatment program focuses on three key areas aimed at optimizing HIV case identification, linkage and initiation of clients on highly active antiretroviral and supporting continuity on treatment including enhancing viral load suppression among the served populations.

## Enhancing Continuity on Treatment and Quality of Care Among People Living With HIV

### EXHIBITORS + KEY CONTRIBUTORS

**Sewe Nicholas**

Quality Improvement Lead

**Prof. Sylvester Kimaiyo**

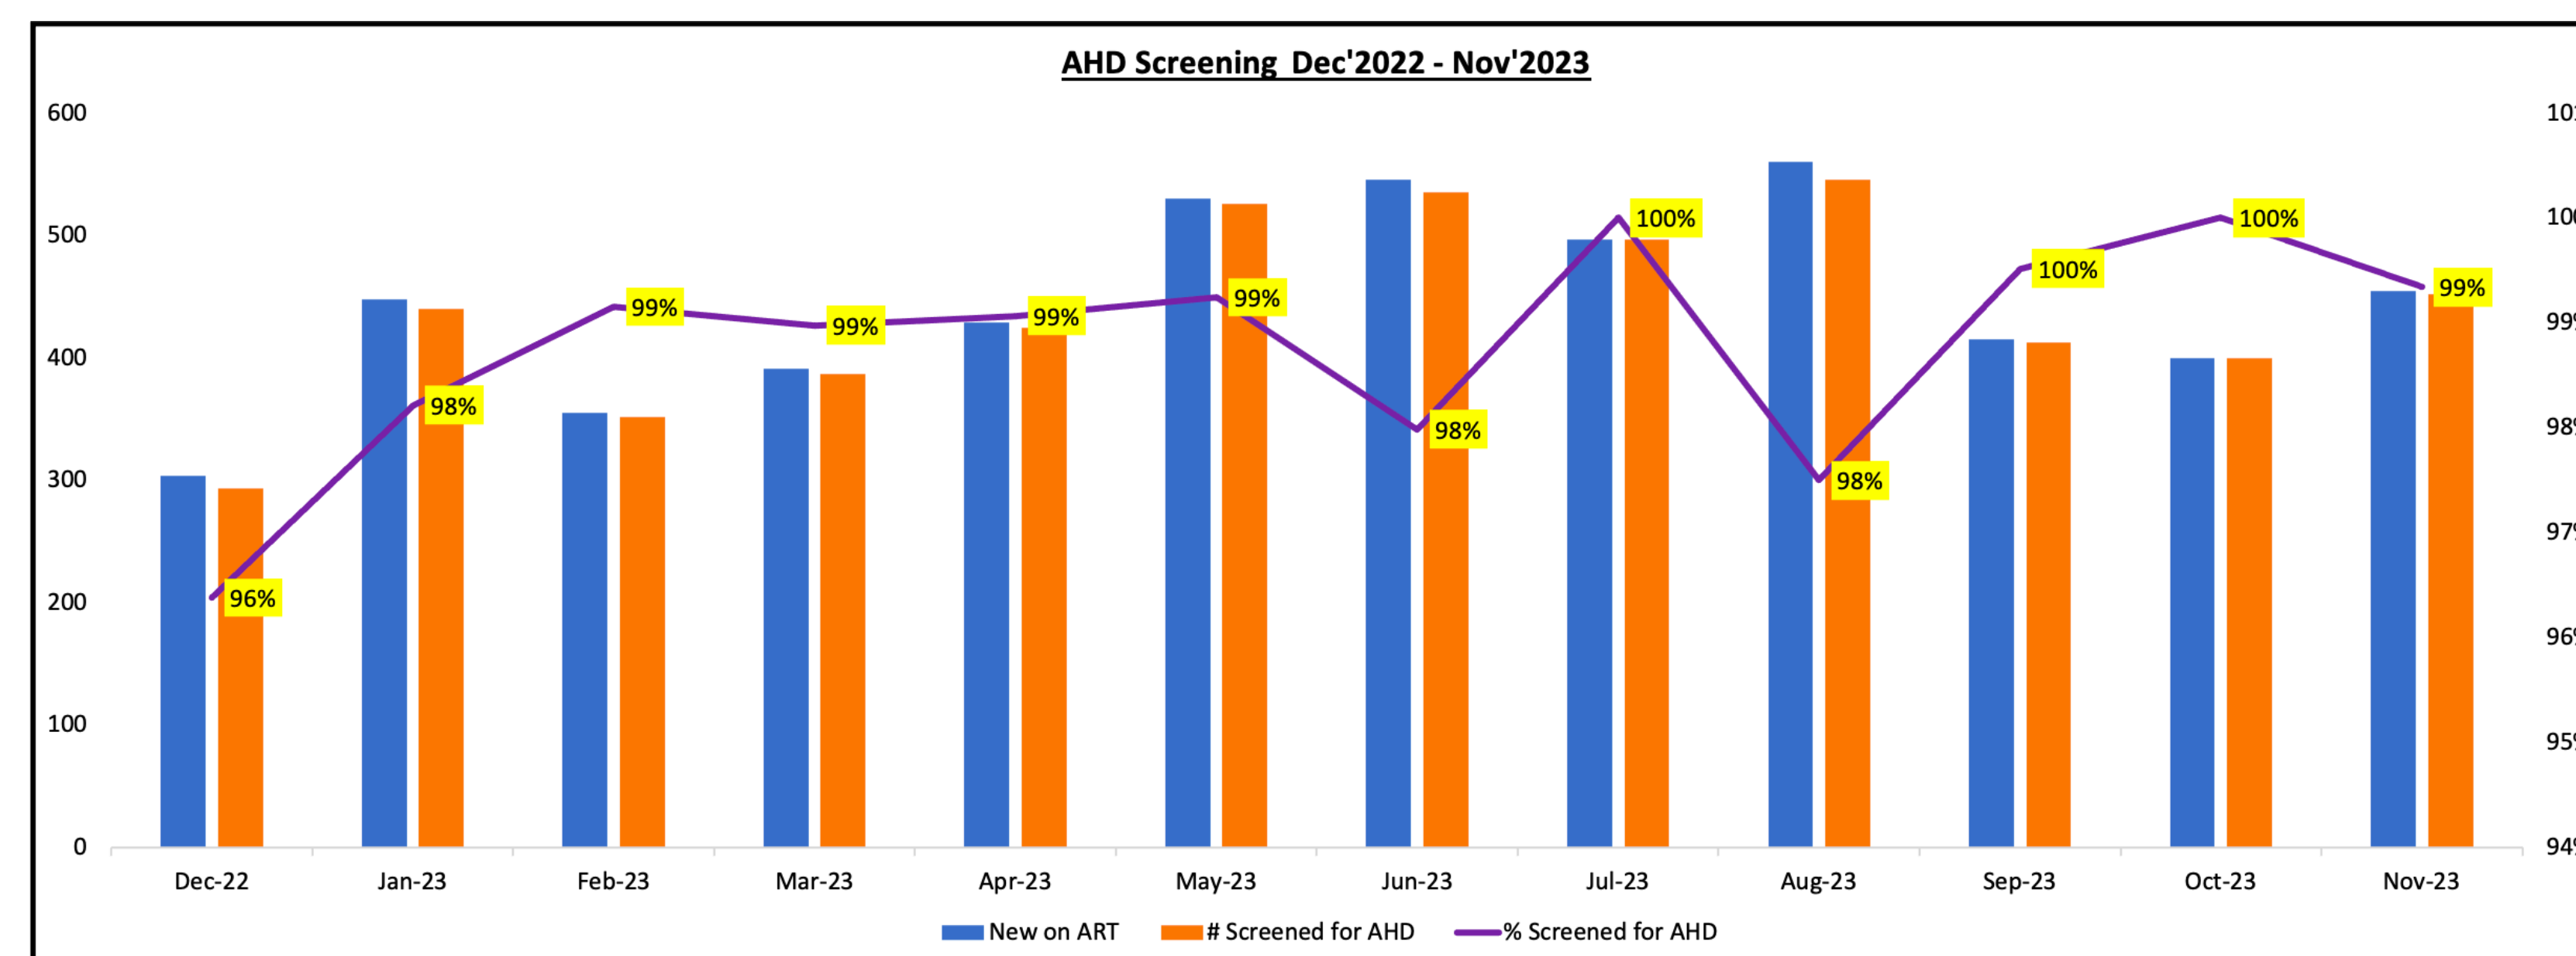

Chief of Party – USAID Ampath Uzima

**Dr. Beatrice Jakait**

Deputy Chief of Party

**Dr. Douglas Gaitho**

Chief Technical Officer

### KEY OBJECTIVES

1. To support continuity on Treatment through reduction of the number of clients who interrupt treatment.
2. To enhance integration of non-communicable diseases within HIV programming
3. To support enhanced quality of care for patients with advanced HIV disease (AHD)

### KEY ACHIEVEMENTS

## Vision for the Future

1. The Program vision is to achieve and go beyond the UNAIDS 95:95:95 targets through enhancing provision of quality care to the target population.
2. Implementation of Differentiated Service Delivery (DSD) to scale across the supported counties to bridge the gap in treatment interruptions.
3. Continuous engagement of the county leadership to scale-up community health strategy and digital data management.

## Challenges

1. Ever dwindling donor funding has limited the reach of the program to a larger population. There is a need for further diversification through attraction of more donors.
2. Increasing numbers of new HIV infections especially among young populations coupled with stigma in the served populations leading to sub optimal uptake of available HIV services.

## Commitment to Equity

1. AMPATH Uzima implements an integrated HIV program ensuring that all elements of health are taken care of including physical, social and mental wellbeing.
2. The program promotes access and utilization of health services to ensure equity irrespective of the location where these clients are found.
