

# Where We Serve

# Focus Area

USAID AMPATH Uzima aims at strengthening the health system within the supported Counties of Elgeyo Marakwet, Trans Nzoia, Uasin Gishu and West Pokot. AMPATH Program developed AMEP a DHIS2 Web-Based platform in 2018 due to the discordance between the KHIS and the donor data reporting platforms. Data entered at facility level by HRIOs for the MOH reportable indicators and has an instance to pull data from KHIS for comparison between 10<sup>th</sup> and 15<sup>th</sup> every month. With the help of the developed dashboards available to all project teams that compares the pulled KHIS data and project data. Before the development of the AMEP system the program used Microsoft Access database that did not have an instance that could run concordance between DATIM, PPMS and KHIS and provide the results for immediate action.

Extract from AMEP dashboards 05/01/2024

## KEY OBJECTIVES

- To evaluate how the AMEP dashboards can be used by program teams to identify the specific indicators and health facilities with data discrepancies.
- To evaluate how the AMEP system has been helpful to program teams, facility teams and County HRIOs in building a common understanding of the indicators which has helped to enhance concordance across various platforms and improve timely and high reporting rates in KHIS.

# Vision for the Future

The program plans to develop Automated Indicator Reporting between AMEP and the EMR systems using the SPOT.

# Challenges

1. Change of indicator definition between MOH and Donor leading to discrepancies that make the measure of concordance impossible.
2. Annual change of donor reporting requirements which implies the need for regular updates.
3. Insufficient funding for system development and maintenance.

# Commitment to Equity

1. Shared belief that health is a fundamental right and that a holistic approach is the best way to support the interconnected aspects of physical, mental and social health and well being.
2. Conforming to the programming designed in response to needs of the populations by ensuring children, adolescents, adults, pregnant and breastfeeding women are given the best quality of care in their various clinics which are fully/semi autonomous yet enjoying the shared specialized services at the same facility i.e. ART Pharmacy, Lab, Radiological Investigations, Revolving Fund Pharmacy, In-patient Facilities, consultant reviews among others.
